

**Installation Manual for the
Model Input 500/650
Audio Input Board**

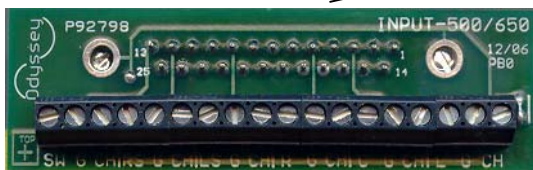

Model Input 500/650 6-Channel Audio Input Board

The Model Input 500/650 Audio Input Card plugs into the **6-channel Audio Input** connector on the CP500 or CP650, and accepts stripped wires from external devices.

Stripped wires can be screwed into the terminals located on the bottom edge of the card to send signals to amplifiers or other equipment. These terminals are labeled with channel designations (L, C, R, LS, RS, SW), G for signal ground, and CH for chassis ground.

NOTE: The pins labeled “CH” are connected to the CPxxx chassis through the D-sub connector frame.

Terminals and DB25 Pin Configuration

SW+	Pin 24
RS+	Pin 2
LS+	Pin 15
R+	Pin 17
C+	Pin 20
L+	Pin 14

The board provides each channel with a signal ground terminal “G”, which connects to DB25 pins 1, and 3-13.

The board provides each channel with a chassis ground terminal “CH”, which connects to the D-sub connector frame, and the CP650 chassis.

Refer to the CP650 installation manual for correct hookup of grounds and shields from input devices.

Warranty Information

Equipment manufactured by Odyssey Products is warranted against defects in materials and workmanship for a one-year period from the date of shipment. There are no other express or implied warranties.

Returns

During the warranty period, Odyssey will repair or replace, at its option, components which prove defective. Equipment must be returned shipped prepaid to Odyssey. Defects caused by modifications, misuse or accidents, or shipping damage caused by inadequate packaging for service return are not covered by this warranty. A Return Authorization Number must be obtained from Odyssey or its agents prior to returning any products. The Return Authorization Number must be marked on all paperwork and labels.

Please send all returns to:
