Bi-Amped VF Series Crossover**

Odyssey VF Series Electronic Bi-Amp Crossover

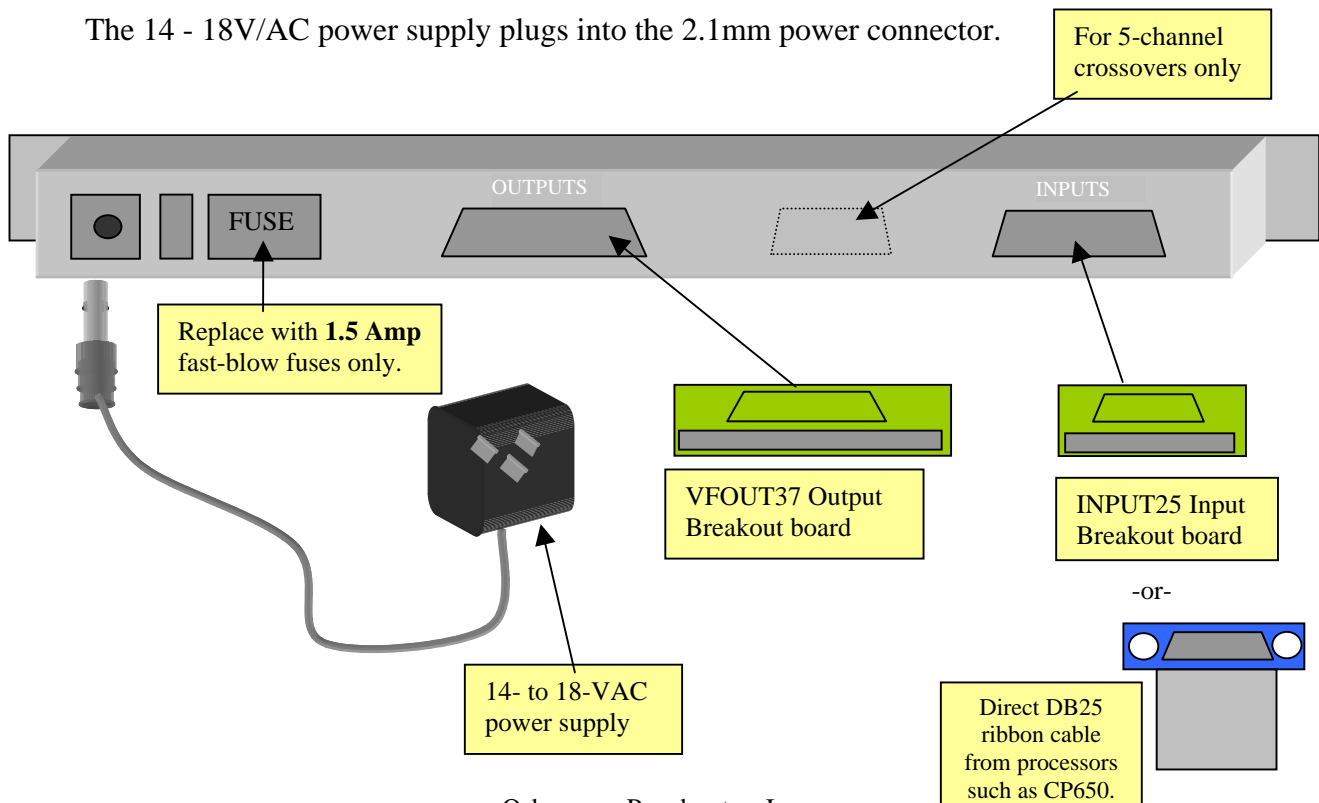

The Odyssey VF Series electronic crossover is designed to be a close-coupled device, specifically matched to the speaker system in the auditorium. Be sure that the crossover you receive is marked for the speakers you are using in the theatre.

The input and output connectors on the VF Crossovers are D-Sub connectors. Adapter cards are supplied with each crossover:

- | | |
|--|---|
| (1) DB25 Input Card
(Part No. INPUT25) | 8 Channel input (conforms to THX pin configuration). |
| (1) DB37 Output Card
(Part No. VFOUT37) | Left, Center, Right outputs.
High and low frequency outputs for bi-amped crossover.
High, low and mid outputs for tri-amped crossover.
Left surround, right surround, subwoofer, outputs passed through from the input card. |
| (1) DB15 Output card | Left extra, right extra outputs (for 5-channel VF only). |

The Input 25 card is marked with channel designations. The Output cards are numbered. Refer to the appropriate pin configuration page for correct output termination (bi-amped or tri-amped).

The 14 - 18V/AC power supply plugs into the 2.1mm power connector.
